Angular Developer Intern

Biyani Technologies Pvt.Ltd.

02/2023 - 07/2023

Kolhapur

Biyani Technologies is a leading software development company .It is a one stop shop for all kinds of Educational software's.

Tasks

- Worked with a team to design, create, and manage Angular based front-end web application components!
- Combine ASP.NET 2012 back-end functionalities with the front-end and establish effective data flow and system performance!
- Used HTML, CSS, and Angular directives to convert design concepts into responsive and online interfaces!
- Implemented interactive features and real-time updates using Typescript to improve user interactions and increase user engagement!
- Finding issues in the Angular code-base, ensuring that the application runs smoothly!

SKILLS

HTML

HTML5

CSS

CSS 3

Bootstrap

Angular

TypeScript

ASP.NET 2012

SQL Database Management

JavaScript Basics

PROJECTS

Online Cable Recharge System (2021)

- HTML,CSS,Flask.
- To simplify the complex process of paying bills of cable we create a online platform where user can basically login with the credentials and provide the required information like name, address and cable registration number.
- In this project I worked to create login page and forms which take user's information and save in database.

Gym Management System (2023)

- HTML, JavaScript, PHP, MySQL.
- As a Gym owner it is very difficult to manage the data of each person who come in gym also it is owners responsibility to provide best experience to the customers.
- We created a system for a Gym owners where user can register a information of customer who join gym like Name, Address, Joining Date , Time Period , etc.
- In this project I worked on front-end as well as back-end where I create connection between the API's and Database.
